

EDUCATION & RESEARCH

Request for Recruitment Program of Foreign Experts 1

Client :	Zhejiang Normal University		
Industry :	Higher Education		
Region :	Jinhua, Zhejiang Province		
Client Information (main areas of activity, etc.) :	Zhejiang Normal University(ZNU) is one of the key universities of Zhejiang Province. ZNU emphasizes in teacher education with multiple branches of learning. The University consists of 19 colleges offering 61 undergraduate programs. It has an enrolment over 25,700 undergraduates, 5,000 postgraduates, and 15,000 adult students in various adult education programs. The total staff is about 2,700. In 2009, ZNU became a doctoral degree project construction unit. Now there are 23 senior subject master degree programs and 11 professional degree Master programs. There are complete infrastructure, rich library resources, and advanced equipment in ZNU.		
Nature of Activity Requirement for Experts (main task, goal to be attained, etc.) :	<ol style="list-style-type: none"> 1. Leverage the key discipline platform of pure and applied mathematics to strengthen international and mainland academic exchange. Invite internationally well-known scholars to visit, give seminars or short courses to introduce research results and directions in frontiers of mathematics. Elevate discipline's international recognition and influence. 2. Carefully select research topics. Choose topics with theoretical depth or those with prospect of wide application and in the mainstream of mathematics with research content keeping with international frontiers. Initiate and develop new research direction. 3. Train high quality researchers. Strengthen the training of graduate students and young faculty members; improve their creativity and implementation skills. Thru short courses to systematically introduce the current state of research, research topics and research methods. Broaden the horizon and area of our research team. 		
Expert Qualification Required (professional, language, educational and working experience , ability, etc) and Date, Duration and Location :	Have done research in pure or applied mathematics, younger than 55 years of age with Ph.D. degree and worked in a international university or research institution at a level comparable to a full-professor with 3-5 years of overseas experience, having noticeable influence on international colleagues in the same area.		
Working Conditions for Experts :	Will provide research grant.		
Proposed Payment for Experts (RMB) :	Professor: RMB 30,000-70,000 every month.	Contact Person	ZHU Xu-ding
Telephone :	Fax: +86-579-82298818	Mobile Phone:	13750982627
Post Address :	688 Yingbin Road, Jinhua, Zhejiang Province, China	Post Code:	321004

Request for Recruitment Program of Foreign Experts 25

Client :	Focused Photonics (Hangzhou) Inc.		
Industry :	Instrument		
Region :	Hangzhou, Zhejiang Province, China		
Client Information (main areas of activity, etc.) :	<p>Focused Photonics (Hangzhou) Inc. is a high-tech enterprise founded by returned overseas students from Stanford University and was established in January 2002 in the national high-tech park of Hangzhou. The company's registered capital is 400 million RMB. In 2011, FPI went to the stock market and became a public company.</p> <p>FPI is committed to R&D, manufacture and instruments marketing for environmental monitoring, industrial process analysis and safety monitoring, and provide integrated solutions which include hardware, software and service for the customers. Products have been widely applied in environmental protection, metallurgy, petroleum, chemical industry, food, agriculture, energy, transportation, water conservancy, construction ,pharmacy, brewing, aviation, scientific research and many other industries, and exported to more than thirty countries include the United States, Japan, Britain, Russia and other countries and regions.</p> <p>After ten years' development and rapid growth, FPI has become the leading company of analytical instrument industry, environmental monitor industry in China. FPI has been identified as "National key high-tech enterprise", "National innovative enterprise", "National key software enterprise", and evaluated as "China's Top 100 potential companies "(No.3 in 2010) by Forbes during the past four years.</p>		
Nature of Activity Requested for Experts (main problems description, assignment target, etc.) :	<p>1.Chief scientist of laboratory instrument (responsible for leading a team for mass spectrometer key technology research and instrument development)</p> <p>2.Chief scientist of industrial process instrument (responsible for overseas technical cooperation and technology import)</p> <p>3.Chief scientist of environmental protection monitor (responsible for analyzing the trend of environmental protection policies, marketing, products and technology, and making business plan for company)</p>		
Expert Qualification Required (professional, language, educational and working experience , ability, etc) and Date, Duration and Location :	<p>1. Chief scientist of laboratory instrument Professional background: analytical chemistry, chemistry, physical chemistry, physics, etc.; Engaged in the chromatographic (GC/LC), mass spectrometry (Q-drop. IT-MS, TOF-MS) analysis technology research, development or related research.</p> <p>2. Chief scientist of industrial process instrument Professional background: process analysis, instrument analysis, industrial automation, industrial equipment and equipment manufacturing and other industries</p> <p>3. Chief scientist of environmental protection monitor Professional background: the overseas environmental protection industry, EPA work experience is better.</p> <p>4. working location: Hangzhou, China</p>		
Working Conditions for Experts :	Excellent living facilities (Standard equipment room, dining room, activity room, gym), good working conditions(plenty of project funds, scientific research lab) and welfare conditions (Including pension, medical subsidy, transportation allowance, communication fees, food allowance and so on)

Request for Recruitment Program of Foreign Experts 30

Client :	Zhejiang Jiuzhou Pharmaceutical Co., Ltd.				
Industry :	Industry				
Region :	Zhejiang Taizhou				
Client Information (main areas of activity, etc.) :	<p>Zhejiang Jiuzhou Pharmaceutical Co., Ltd. is a Hi-tech private enterprise. It always focuses on the production of medicine intermediates, APIs and dosage forms. Our company has set up an efficient quality control system and has passed ISO9001, SFDA'S(State Food and Drug Administration) GMP inspection, Cos certification and U.S.A. FDA inspection, etc. Our main products are related to Central Nervous System, Anti-infection, Non-steroid anti-inflammatory and hypoglycemic, as well as cardiovascular disease. Our products have been sold well in domestic and oversea markets.</p> <p>Zhejiang Jiuzhou Pharmaceutical Co., Ltd has set up two R&D centers and a base for pilot scale research in Taizhou City and Hangzhou City of Zhejiang Province, respectively. It established the provincial-level technology research and development center in 2001 and the post-doctoral research station in 2008. In 2010, sales revenue of our company amounts to 0.83 billion Yuan and the total profits amounts to 110 million Yuan. Now, more than one third of staffs are technical persons, among which 12 doctors and more than 40 masters. The technologies involved have won plenty of state, provincial and municipal honors for science and technology innovations.</p>				
Nature of Activity Requested for Experts (main problems description, assignment target, etc.) :	<p>he problems that need to be solved are following: 1) Developing and improving the chemical process for the organic synthesis of Imatinib mesylate, and then doing pilot- scale research for it as well as accumulating data and optimizing the process conditions. 2) Establishing a standard synthesis process for reusing raw materials and the special treatment or processing of three wastes.</p>				
Expert Qualification Required (professional, language, educational and working experience , ability, etc) and Date, Duration and Location :	<p>Ph.D degree abroad in chemical engineering, organic synthesis or related majors with a minimum of 5 years industrial experience in overseas pharmaceutical industry, especially in R&D field. An experienced individual to lead multiple group of process chemists working on the process design, process optimization and scale-up in plant. Good communication skill and strong chemical process knowledge are required.</p>				
Working Conditions for Experts :	<p>Providing enough instruments, equipments and affiliated equipments, distributing corresponding technical personnel and forces for the R&D systematically and creating a well living and working environment.</p>

Request for Recruitment Program of Foreign Experts 31

Client :	Sanbian Tech-Sci. Corp. Ltd.		
Industry :	Electrical machinery and equipment manufacturing		
Region :	Taizhou, Zhejiang		
Client Information (main areas of activity, etc.) :	SANBIAN SCI-TECH CO., LTD, a key enterprise in Zhejiang province and a second-level enterprise in China, was established in October ,1968. The company possesses a total assets of 1 , 000,000,000RMBYuan, occupies an area of 340,000m ² , and has more than 1000staffs . the annual production capacity is about 20 , 000 , 000kVA , the annual turnover is more than 1,000,000,000RMB yuan, it is a “National Key High & New Technology Enterprise ” authorized by National Technology Department 。 Main products included 220kV and below all kinds of power transformer .		
Nature of Activity Requested for Experts (main problems description, assignment target, etc.) :	Research some core technology of above 220kV transformer on technique simulate and performance index.		
Expert Qualification Required (professional, language, educational and working experience , ability, etc) and Date, Duration and Location :	Specilized in design and manufacturing aspects of power transformer , he can speak English smoothly with high theory stages and have abound actual experience in transformer design , manufacturing and test , especially in transformer design . He can explain all of the questions proposed by us and he can also solve them efficiently and quickly. Experts in their own arrangements for a period of work. Work address: Sanbian Tech-Sci. Corp. Ltd.Industrial Park.		
Working Conditions for Experts :	Our company is located at the downtown of Sanmen. It's convenient to take bus or car. We will provide experts with good working environment, such as office, computer, and interpreter, assistant and so on. We are also responsible for preparing living place so as to meet expert's various living needs.

Request for Recruitment Program of Foreign Experts 33

Client:	Zhejiang Economic Construction Investment Company Limited		
Industry:	Industrial investment		
Region:	Hangzhou		
Client Information (main areas of activity, etc.):	Zhejiang Economic Construction Investment Company Limited is the shareholder company of CSR Hangzhou Rail Transit Co.,Ltd, Hangzhou CSR Electric Equipment Co.,Ltd, Jiaxipera Compressor Co.,Ltd, Zhejiang Jingning Shangbiao Waterpower Co.,Ltd and several monetary and securities firms through the way of equity participation or investment holding. During the 'twelfth Five-Tear Plan' period, the company will focus on fostering the advanced manufacturing industry sector with the high-end equipment manufacturing industry investment, developing the business in the Strategic emerging industries.		
Nature of Activity Requested for Experts (main problems description, assignment target, etc.):	1. Foster pharmaceutical industry: provide major input in investment of the pharmaceutical manufacturers, initiate new drug development and patent applications, to achieve large-scale production. 2. Fosters advanced manufacturing industry sector: provide major input in investment of railway equipment manufacturing companies, take the lead in managing, preparing and monitoring industrial chain projects, carry out duties through guiding the process of researching, producing, purchasing and marketing of the project; provide major input in investing other kinds of advanced manufacturing companies, take the lead in managing, preparing and monitoring new projects. 3. Expands the scale of industrial investment, combines industry with finance: provide major input in researching potential projects and bring forth new ideas, responsible for initiating operational proposals, project research, investigation, negotiation, as well as providing expertise in capital investment decisions.		
Expert Qualification Required (professional, language, educational and working experience, ability, etc)and Date, Duration and Location	2 pharmaceutical experts: has more than 10 years of experience in organic synthetic chemistry researching and management in pharmaceutical multinational firm, has a good grasp of the regulations and standard of pharmaceutical industry, owns extensive network contacts in the field, be able to take the lead in initiating new drug development, obtains more than 5 patents. 2 equipment manufacturing experts: has extensive management experience in the multinational company in the field of the inter-city motorcoach train and subway train (expert who has worked in the world-class manufacturing companies such as Siemens and Bombardier, and owns relevant experience will be preferred)as well as advanced manufacturing industry, which includes mechanical, electric, electronic etc. owns extensive network contacts in the industry.; be familiar with the regulations and standard of the industry; has a good grasp of the railway equipment industrial chain, especially electrical system, trailer system, core components etc., obtain proved management experience in product design, technique, quality, cost control, market etc.. 2 industrial investment experts: has more than 10 years of management experience in capital operation, has successfully directed more than 3 capital operation and investment projects, has sound knowledge of equity investment process in advanced manufacturing industry, works independently in project management, research and negotiation, owns extensive network contacts in client base and business resource.		
Working Conditions for Experts:	We can provide supporting facilities of labor power and capital. The experts will be accompanied with assistant and translator.

Requirements for Invited Program of Foreign Specialist 34

Company Name:	Ningbo Oceanking Chemical Developing Corp.		
Trade:	Chemicals		
Locality:	Ningbo, Zhejiang Province, China		
Company Information (main operation scope, etc.):	<p>Ningbo Oceanking Chemical Developing Corp. belong to wholly owned subsidiaries of Zhejiang Railway. It is located at Ningbo Petrochemical Economic & Technological Development Zone, annual sales 1.2 milliard, occupied area 750 mu, mainly engaged in chlor-alkali industrial, and is now constructing Polycarbonate Plant in PRC. At the end of 2015, its annual sales will reach 9 milliard, 5 milliard total assets and 1.1 milliard total profit.</p> <p>Company will construct province grade Company Technical Center, Pilot Test Base and proposed national grade Engineering Research Center will be built.</p> <p>Currently, interiorly optimized catalyst recipe and process technic of produced polycarbonate, localized main machine, serialized production mark and scale manufacture etc. compared with foreign have larger gap. Therefor cooperative research with foreign specialist will enhance technical merit in the field.</p>		
Requirement for Specialist (main problems description, assignment target, etc.):	<ol style="list-style-type: none"> 1. Optimization of catalyst and auxiliaries are selected, determined and characterized. 2. Optimization of process flow and technical parameters are ascertained. 3. Optimizations of serialized production mark and process technological conditions are determined. 4. Industrial scale is magnified. 		
Requirement for Foreign Specialist (specialty, language, educational, working experience, ability and etc.) , Target Date, Duration and Work Location	<ol style="list-style-type: none"> 1. Senior specialist in polymer material field 2. Target date in China: by the end of June 2013 3. Duration: 30 days 		
Work Conditions for Specialist:	Office of Foreign Specialist, proficient technology Assistant and Translators		
Proposed Payment for Specialist(RMB) :	annual pension 1 million RMB	Contact Person:	Gong Qizhi

ENERGY

Request for Recruitment Program of Foreign Experts 21

Client :	China HuaDian Electric Research Institute/National Energy Distributed Energy Technology Research and Development (Tests) Center		
Industry :	Energy/power		
Region :	Hangzhou City, Zhejiang ,China		
Client Information (main areas of activity, etc.) :	<p>National Energy Research and Development Center, an important part of State Scientific and Technological Innovation System, is set up for meeting the demand of energy development and technological progress. National Energy Distributed Energy Technology Research and Development (Tests) Center is one of the eight National Energy Research and Development Centers established by the state for the third time. Working together with China HuaDian Electric Research Institute and owning several professional laboratories, its related research and development work is built and organized by China Huadian Cooperation. Focusing on the distributed cooling heating and power system, R&D center relies on several technologies with independent intellectual property rights such as small gas turbine technology, heat recuperation technology, energy storage technology, system integration and testing technology, operation and control technology and power system technology, constructs on the following three aspects: core technology research, system integration and demonstration project. The aim is to solve the realistic problems in distributed energy promotion and application, meet the needs of distributed energy technology and promote the strong technological support of distributed energy development.</p>		
Nature of Activity Requested for Experts (main problems description, assignment target, etc.) :	<p>Research in the distributed energy system integration technology, the heat pump technology, small gas turbine technology, sterling machine technology, the solar energy light heat utilization technology, a new efficient energy storage technology, smart grid technology, etc; earn some achievements.</p>		
Expert Qualification Required (professional, language, educational and working experience , ability, etc) and Date, Duration and Location :	<p>Doctor's degree or above, have experience in distributed energy, willing to engage in distributed energy in Hangzhou to promote technological progress for China, able to start work within two months after the success of interview.</p>		
Working Conditions for Experts :	<p>The only national distributed energy system integration test experimental platform, have signed some strategic cooperation agreements with famous universities of China, research results depend on the platform of China Huadian group company, own the obvious base advantage of achievements transformation.</p>
